EN portable radio

Before using the product for the first time, please read the instructions for use below and retain them for later reference. The original instructions were written in Hungarian language. This appliance may only be used by persons with impaired physical, sensory or mental capabilities, or lacking in experience or knowledge, as well as children from the age of 8, if they are under supervision or have been given instruction concerning use of the appliance by a person responsible for their safety and they have understood the hazards associated with use. Children should not be allowed to play with the unit. Children may only clean or perform user maintenance on the appliance under supervision.

Two-band, AM-FM radio • Compact, massive, portable design • Can be operated from the mains or battery • Switch-on indicator LED • Ear- or headphones can be connected (option) • Headphone connector socket: 3.5 mm • Power supply: built-in power cable or 4xC(LR14/1.5V) batteries (not included) • Dimensions/weight: 260x135x70 mm / 660 g

STARTUP

The device has two types of power supply. Lead the built-in power cable through the opening provided for it, so that it does not break at sharp angles, and do not pull it tight. Connect it to the network. You can also operate it from 4xC (LR14/1.5 V) batteries.

- Reception conditions are poor. You are in an area that is badly covered.
- Select another radio station with better quality or another waveband. Keep in mind that nearby electrical equipment or larger metal objects may interfere with reception.

• Insert 4 x C(LR14 batteries into the battery compartment with the polarity indicated. If you want to use it from battery, store the cable securely in the compartment.

• It does not cause a problem if you connect it to the mains with the batteries inserted. The batteries/accumulators do not charge.

• Do not store batteries if you are constantly using it from the mains!

• When not in use for a long time, unplug it from the mains!

• The fading screen, falling volume, distorted sound, or blinking light indicates battery depletion. Immediately remove them!

• Do not use different kinds of batteries and/or used and new batteries together!

• If there is some liquid flown out from the battery, take a protective glove, and clean the battery holder with a dry cloth! It is forbidden to open, burn and short-circuit or charge batteries! Non-rechargeable batteries must not be charged! Risk of explosion! Do not insert accumulators instead of batteries because they have a significantly lower voltage and the efficiency!

INSTALLATION

Turn the VOLUME knob down to switch the radio on and to adjust the volume. When you have finished listening to the radio, you can switch it off with the same button by turning it up until it clicks. When the unit is on, a red LED indicator on the front panel illuminates.

USING THE RADIO

Select the desired waveband with the BAND button (AM-FM). In case of the FM band, carefully pull out the antenna and rotate it to obtain the best reception. In case of listening to the AM band, an internal antenna works. Do not unplug the FM antenna, but turn the unit to the best reception position.

• The radio's reception capacity depends to a large extent on the place of use and the current reception conditions.

• Nearby electrical equipment and larger metal objects may interfere with reception.

• Handle the antenna carefully, so that you not break it!

EARPHONE CONNECTOR

You can connect your earphone with a 3.5 mm plug to the PHONE socket on the

left side. The speaker then switches off. This unit is capable for mono reception, but you can also connect a stereo earphone or headphone to it. Both of its speakers will work.

CLEANING

Before cleaning, power off the device by unplugging it from the mains! Clean the plastic housing with a soft, dry cloth. Do not scrub the glossy surface with strong wiping! Do not use aggressive cleaners and liquids!

MAINTENANCE

- Periodically check the power cable and the casing for damage.
- Immediately switch off the unit if there is any malfunction, and contact a professional!

TROUBLESHOOTING

If the volume or sound quality deteriorates, replace the batteries. Weak, noisy reception

- Due to its special features, AM reception is suitable for listening to distant radio stations, but the sound quality is lower. The FM band provides better quality, but closer radio stations can be received.
- Check on which band does the desired station broadcast. It is recommended to use the FM band if possible.

• The antenna length is not enough.

- Unplug the antenna completely and search for the best position. In case of AM band, do not unplug the telescopic antenna.
- Teljesen húzza ki az antennát és keresse meg a legjobb pozíciót. AM sáv esetén ne húzza ki a teleszkópos antennát.

• Reception conditions are poor. You are in an area that is badly covered.

- Select another radio station with better quality or another waveband. Keep in mind that nearby electrical equipment or larger metal objects may interfere with reception.

• Insert 4 x C(LR14 batteries into the battery compartment with the polarity indicated. If you want to use it from battery, store the cable securely in the compartment.

• It does not cause a problem if you connect it to the mains with the batteries inserted. The batteries/accumulators do not charge.

• Do not store batteries if you are constantly using it from the mains!

• When not in use for a long time, unplug it from the mains!

• The fading screen, falling volume, distorted sound, or blinking light indicates battery depletion. Immediately remove them!

• Do not use different kinds of batteries and/or used and new batteries together!

• If there is some liquid flown out from the battery, take a protective glove, and clean the battery holder with a dry cloth! It is forbidden to open, burn and short-circuit or charge batteries! Non-rechargeable batteries must not be charged! Risk of explosion! Do not insert accumulators instead of batteries because they have a significantly lower voltage and the efficiency!

• The radio's reception capacity depends to a large extent on the place of use and the current reception conditions.

• Nearby electrical equipment and larger metal objects may interfere with reception.

• Handle the antenna carefully, so that you not break it!

EARPHONE CONNECTOR

You can connect your earphone with a 3.5 mm plug to the PHONE socket on the

FÜLHALLGATÓ CSATLAKOZÓ

A bal oldali PHONE aljzathoz csatlakoztattha 3.5mm-es dugóval ellátott

fülhallgatót. A hangszerő ekkor kikapcsol. E készülék mono vételre alkalmas, de csatlakoztatáhat sztereó fülhallgatót vagy fejhallgatót is. Annak mindenki hangszerőja működni fog.

LIKVIDACE BATERIÍ A AKUMULÁTORU

S bateriem / akumulátoru se nesmír nakládat jako s běžným domovním odpadem. Zákonnou povinností je odvádění baterií a akumulátoru na území sítě, které je určeno pro zpracování místního odpadu.

DISPOSING OF ALKALINE AND RECHARGEABLE BATTERIES

Batteries, whether alkaline or rechargeable, must not be handled together with regular household waste. It is the legal obligation of the product's user to dispose of batteries at a nearby collection center or at a retail shop. This ensures that the batteries are ultimately managed by others and yourself. If you have any questions, contact the local waste management organization. We shall undertake the tasks pertinent to the manufacturer as prescribed in the relevant regulations and shall bear any associated costs arising.
