

A detailed line drawing of a portable audio player, possibly a cassette player, shown from a three-quarter perspective. The device is rectangular with rounded corners. The top panel features a cassette slot, two volume knobs, and several buttons. A large speaker grille with a fine mesh pattern covers the front face, with a small rectangular logo in the center that reads "SAL". The side of the device shows a vertical strap or latch mechanism. Three dimension lines with arrows indicate the size: a vertical line on the left for height, and two diagonal lines at the bottom for width and depth.
